The Department of Anthropology offers a balanced and flexible program
of academic courses and research in cultural anthropology, linguistic
anthropology, archaeology and biological anthropology. Anthropology
contributes to an understanding of the complex problems of human
behavior, biology, language, cultural and social organization, and the
relationship of humans to their environments. Research carried out in
the field, laboratory and library emphasizes past and present modes of
living and the origins and distribution of peoples and cultures throughout
the world. Although special attention is given to the circumpolar North,
faculty also maintain active research programs elsewhere, such as Africa
and North America.
