DVM F637  Veterinary Bacteriology and Myology
3 Credits
This course will discuss bacterial structure, differences between bacterial families, and fungi and their pathogenesis. The basic principles of bacterial and fungal pathogenesis will be presented. Host response to bacterial or fungal infection, immunity and the role of vaccines in disease prevention will be explained.
Prerequisites: Successful completion of first semester veterinary courses; or permission of instructor.
Cross-listed with BIOL F632; MSL F637.
Lecture + Lab + Other: 3 + 0 + 0

DVM F638  Veterinary Parasitology
2 Credits
Offered Spring
Biology of helminth, arthropod and protozoan pathogens of animals with emphasis on common infectious diseases encountered in veterinary practice will be discussed. In addition, the course will discuss treatment and management options for parasitic infections of domestic animals.
Prerequisites: Successful completion of first semester veterinary courses.
Cross-listed with BIOL F634; MSL F638.
Lecture + Lab + Other: 2 + 0 + 0

DVM F639  Veterinary Virology
2 Credits
Offered Spring
This course will explore current concepts in the field of veterinary virology, with an emphasis on the viral structure, viral genetic material and viral replication strategies of various animal viruses. In addition, mechanisms of viral pathogenesis, prevention and treatment of viral infection will be presented.
Prerequisites: Successful completion of first semester veterinary courses.
Cross-listed with BIOL F639; MSL F639.
Lecture + Lab + Other: 2 + 0 + 0

DVM F640  Veterinary Pathology/Biology of Disease I
5 Credits
Offered Spring
This course will discuss basic principles of disease with special emphasis on processes likely to be encountered veterinary practice. We will discuss these topics organized by underlying disease mechanism. The discussions will move from general cell mediated processes to more specific disease mechanisms.
Prerequisites: Successful completion of first semester veterinary courses; or permission of instructor.
Cross-listed with BIOL F640; MSL F642.
Lecture + Lab + Other: 4 + 3 + 0

DVM F648  Food Animal Production and Food Safety
2 Credits
Offered Spring
This course is designed to provide an understanding of food animal agriculture and food quality assurance. Students will explore contemporary production management systems of traditional and non-traditional food animal species. Animal welfare issues related to the raising of animals for food will be investigated. Students will learn where veterinary medicine fits into the protection of the human food supply.
Prerequisites: Successful completion of first semester veterinary courses.
Lecture + Lab + Other: 2 + 0 + 0

DVM F681  Performance Dog Medicine and Surgery
2 Credits
Offered Fall
Designed to provide the student with a basic understanding of the different types of performance dog activities, to identify the unique demands, husbandry, management issues and basic physiological impacts of each category of performance exercise and to gain a basic understanding of commonly observed injuries and their prevention/treatment. This course is designed for veterinarians and veterinary students - the information provided is only partially covered during the regular DVM-curriculum and hence no other prerequisites are required.
Prerequisites: Good standing in professional veterinary program.
Lecture + Lab + Other: 2 + 0 + 0

DVM F693  Special Topics
1-6 Credits
Lecture + Lab + Other: 1-6 + 0 + 0

DVM F710  Foundations of Veterinary Medicine III
1 Credit
Offered Fall
The third semester of a four-course series in foundations of veterinary medicine. The full course series will encompass topics in ethics, communication, physical exam skills, surgical skills, clinical reasoning and professional development. Expanded physical examination of companion animals and livestock will be taught with special emphasis on advanced cardiopulmonary auscultation, mammary gland evaluation, otic exam and colic evaluation.
Prerequisites: DVM F611.
Lecture + Lab + Other: 0 + 3 + 0

DVM F711  Foundations of Veterinary Medicine IV
1 Credit
Offered Spring
The fourth semester of a four-course series in Foundations of Veterinary Medicine. The full course series will encompass topics in ethic, communication, physical exam skills, surgical skills, clinical reasoning and professional development. Expanded physical examination of companion animals and livestock will be taught with special emphasis on advanced techniques in reproduction, surigical skills, anesthesia, and patient management.
Prerequisites: Successful completion of DVM F710.
Lecture + Lab + Other: 0 + 3 + 0

DVM F714  Preventative Veterinary Medicine
4 Credits
Offered Fall
The course will provide understanding of host/disease/agent interaction and the essential steps in disease outbreak investigation. Clinical and herd-based scenarios will be used for discussion of epidemiologic principles, features of zoonotic disease and specific biosecurity and infectious control issues as they relate to food safety and livestock production.
Prerequisites: Veterinary medicine student in good standing.
Lecture + Lab + Other: 4 + 0 + 0
DVM F722  Veterinary Pharmacology  
4 Credits  
Offered Fall  
This course covers basic principles of pharmacology of common drugs and basic mechanisms of action. Individual agents will be introduced as examples. As a medicine course, the proper and effective use of drugs will be reviewed including basics of veterinary therapeutics for selected classes of agents across selected species.  
Prerequisites: Successful completion of all required first year courses in DVM program, including advancement to year two; or permission of instructor.  
Lecture + Lab + Other: 4 + 0 + 0

DVM F724  Veterinary Bioanalytical Pathology  
6 Credits  
Offered Fall  
Professional veterinary program requirement studying pathology, hematology, biochemistry and cytopathology.  
Prerequisites: Successful completion of first year professional veterinary medical program; or permission of instructor.  
Lecture + Lab + Other: 5 + 2 + 0

DVM F726  Principles of Imaging Interpretation  
1 Credit  
Offered Spring  
This is the first of a two part series in imaging interpretation. This course covers gastrointestinal, thoracic and cardiac imaging. The second part of the course is held in the fall of the 3rd year at Colorado State (VM728) and will cover equine and small animal musculoskeletal, urinary tract and neurological imaging.  
Prerequisites: good standing in Professional Veterinary Program.  
Lecture + Lab + Other: 1 + 0 + 1

DVM F733  Principles of Surgery  
2 Credits  
Offered Spring  
This course teaches principles and concepts of general and orthopedic surgery, including aseptic technique, surgical instrumentation, suture patterns, tissue healing and wound management. These topics comprise core material that prepares veterinary students for specific surgery.  
Prerequisites: Successful completion of first year veterinary medical program; good standing in professional veterinary medicine program.  
Lecture + Lab + Other: 1 + 3 + 0

DVM F741  Pathology of Organ Systems  
4 Credits  
Offered Fall  
The course will discuss basic principles of disease with special emphasis on organ system diseases most likely to be encountered in veterinary practice. The discussions will move from general cell mediated processes to more specific disease mechanisms in a variety of domestic and exotic species.  
Prerequisites: Successful completion of first year of courses in the professional veterinary curriculum.  
Lecture + Lab + Other: 3 + 2 + 0

DVM F744  Theriogeneology  
3 Credits  
Will familiarize students with reproductive organs of large and small animals: regulation of function, reproductive endocrinology, reproductive cycles and the physiology and pathology of reproduction.  
Prerequisites: Satisfactory completion of year 1 and good standing in professional veterinary program.  
Lecture + Lab + Other: 2 + 2 + 0

DVM F745  Clinical Sciences I  
5 Credits  
Offered Spring  
This course is an introduction to clinical reasoning and problem solving as a diagnostician. Diagnostic approaches to common medical problems of cardiovascular, urinary and digestive-hepatic systems.  
Prerequisites: Second year professional veterinary medicine program student in good standing or permission of instructor.  
Lecture + Lab + Other: 10 + 0 + 0

DVM F747  Clinical Sciences II  
5 Credits  
Offered Spring  
Continuation of clinical reasoning and problem solving as a diagnostician. Diagnostic approaches to common medical problems of cardiac, pulmonary systems and fluid and electrolyte disorders of small and large animals.  
Prerequisites: Second year professional veterinary medicine program; student in good standing or permission of instructor.  
Lecture + Lab + Other: 10 + 0 + 0

DVM F751  Veterinary Clinical Toxicology  
2 Credits  
Offered Fall  
This course will provide an overview of clinical toxicology relevant to veterinarians.  
Prerequisites: Successful completion of all required first year courses in DVM program, including advancement to year two; or permission of instructor.  
Lecture + Lab + Other: 2 + 0 + 0

DVM F777  Strategies for Establishing and Maintaining Well-being in the Veterinary Profession  
1 Credit  
Offered Spring  
This course will investigate and demonstrate methods for maintaining well-being while managing the stress associated with membership in the Veterinary Profession. Strategies for time management, life balance, nutrition, exercise and recovery will be discussed as means of enhancing well-being and preventing professional burnout which is widespread in the profession today. This course will utilize hands on engagement as well as live and distance discussions with experts in the respective multidisciplinary fields that contribute to well-being.  
Prerequisites: Good standing in the Professional Veterinary program.  
Lecture + Lab + Other: 1 + 0 + 0
