**VETERINARY MEDICINE (DVM)**

**DVM F495**  
Special Topics  
1-6 Credits  
Lecture + Lab + Other: 1-6 + 0 + 0

**DVM F606**  
Immunology  
3 Credits  
Offered Fall  
Adaptive immune response including its components and activation from cells to molecules, clonal selection, antigen recognition, and discrimination between foreign and self. Concepts applied on the level of intact organisms addressing allergies, autoimmunity, transplantation, tumors and disease (AIDS).  
Prerequisites: Admittance to the professional veterinary program.  
Stacked with BIOL F456.  
Lecture + Lab + Other: 1 + 0 + 0

**DVM F610**  
Foundations of Veterinary Medicine  
1 Credit  
Offered Fall  
The first semester of a four-course series in foundations of veterinary medicine. The full course series will encompass topics in ethics, communication, physical exam skills, surgical skills, clinical reasoning and professional development. This course will help you develop the professional skills necessary for the successful practice of veterinary medicine.  
Prerequisites: Admittance to the professional veterinary program.  
Lecture + Lab + Other: 1 + 0 + 0

**DVM F611**  
Foundations of Veterinary Medicine II  
1 Credit  
Offered Spring  
The second semester of a four-course series in foundations of veterinary medicine. The full course series will encompass topics in ethics, communication, physical exam skills, surgical skills, clinical reasoning and professional development. This course will help you develop the professional skills necessary for the successful practice of veterinary medicine.  
Prerequisites: DVM F610.  
Lecture + Lab + Other: 5 + 5 + 0

**DVM F616**  
Functional Anatomy  
8 Credits  
Offered Fall  
The course will include an introduction to veterinary anatomy: basic veterinary anatomy, orientation, nomenclature, locomotion apparatus, circulatory system, digestive, respiratory apparatus, lymphatic organs and nervous system of domestic animals. A general explanation of the basic anatomical preparation techniques will be presented to improve the manual skills of the students. The course will place the anatomical knowledge in a clinical context.  
Prerequisites: Admittance to the professional veterinary program.  
Stacked with MSL F618.  
Lecture + Lab + Other: 5 + 6 + 0

**DVM F618**  
Physiology and Histology  
7 Credits  
Offered Fall  
The course will discuss the histology and physiology of domestic animal organ systems, tissues, cartilage, bone, muscle, arthrology, nervous system, hematopoiesis, lymphatic, cardio-vascular, respiratory and digestive systems; the renal system and physiology. The course will help to place the knowledge in histology and physiology in a clinical context.  
Prerequisites: Admittance to the professional veterinary program.  
Lecture + Lab + Other: 6 + 3 + 0

**DVM F619**  
Veterinary Neurobiology  
4 Credits  
Offered Spring  
Students will learn information on neurologic conditions in domesticated animals. A problem-oriented approach makes it easy to diagnose and treat neurologic problems in domesticated animals. The coverage of disorders by problem, not by established disease diagnosis, emulates how animals present to the veterinary hospital and simplifies the formulation of a correct diagnosis.  
Prerequisites: Successful completion of first semester veterinary courses.  
Lecture + Lab + Other: 3 + 3 + 0

**DVM F623**  
Veterinary Nutrition and Metabolism  
2 Credits  
Offered Fall  
This course will examine the nutritional needs of major species of veterinary importance. Discussion will revolve around specific nutritional needs as they relate to life-stages and production status of monogastric and ruminant animals. Course topics deal with the classification and function of nutrients, digestive processes (monogastric, ruminant, hind-gut fermenters), evaluation of feedstuffs and feed labels, and principles of disease related to nutritional deficiency as well as nutritional excess.  
Prerequisites: Successful completion of first semester veterinary courses.  
Cross-listed with MSL F613.  
Lecture + Lab + Other: 2 + 0 + 0

**DVM F625**  
Principles of Diagnostic Imaging  
2 Credits  
Offered Fall  
The course will include an introduction to radiographic anatomy of small and large animals; introduction to x-ray, MRI and CT. The course will help to place the anatomical knowledge into clinical context.  
Prerequisites: Admittance to the professional veterinary program.  
Lecture + Lab + Other: 2 + 0 + 0
DVM F637  Veterinary Bacteriology and Mycology
3 Credits
This course will discuss bacterial structure, differences between bacterial families, and fungi and their pathogenesis. The basic principles of bacterial and fungal pathogenesis will be presented. Host response to bacterial or fungal infection, immunity and the role of vaccines in disease prevention will be explained.
Prerequisites: Successful completion of first semester veterinary courses.
Cross-listed with BIOL F632; MSL F637.
Lecture + Lab + Other: 3 + 0 + 0

DVM F638  Veterinary Parasitology
2 Credits
Offered Spring
Biology of helmint, arthropod and protozoan pathogens of animals with emphasis on common infectious diseases encountered in veterinary practice will be discussed. In addition, the course will discuss treatment and management options for parasitic infections of domestic animals.
Prerequisites: Successful completion of first semester veterinary courses.
Cross-listed with BIOL F634; MSL F638.
Lecture + Lab + Other: 2 + 0 + 0

DVM F639  Veterinary Virology
2 Credits
Offered Spring
This course will explore current concepts in the field of veterinary virology, with an emphasis on the viral structure, viral genetic material and viral replication strategies of various animal viruses. In addition, mechanisms of viral pathogenesis, prevention and treatment of viral infection will be presented.
Prerequisites: Successful completion of first semester veterinary courses.
Stacked with BIOL F639; MSL F639.
Lecture + Lab + Other: 2 + 0 + 0

DVM F640  Veterinary Pathology/Biology of Disease I
5 Credits
Offered Spring
This course will discuss basic principles of disease with special emphasis on processes likely to be encountered veterinary practice. We will discuss these topics organized by underlying disease mechanism. The discussions will move from general cell mediated processes to more specific disease mechanisms.
Prerequisites: Successful completion of first semester veterinary courses.
Cross-listed with BIOL F640; MSL F642.
Lecture + Lab + Other: 4 + 3 + 0

DVM F648  Food Animal Production and Food Safety
2 Credits
Offered Spring
This course is designed to provide an understanding of food animal agriculture and food quality assurance. Students will explore contemporary production management systems of traditional and non-traditional food animal species. Animal welfare issues related to the raising of animals for food will be investigated. Students will learn where veterinary medicine fits into the protection of the human food supply.
Prerequisites: Successful completion of first semester veterinary courses.
Lecture + Lab + Other: 2 + 0 + 0
DVM F722  Veterinary Pharmacology
4 Credits
Offered Fall
This course covers basic principles of pharmacology of common drugs and basic mechanisms of action. Individual agents will be introduced as examples. As a medicine course, the proper and effective use of drugs will be reviewed including basics of veterinary therapeutics for selected classes of agents across selected species.
Prerequisites: Successful completion of all required first year courses in DVM program, including advancement to year two; or permission of instructor.
Lecture + Lab + Other: 4 + 0 + 0

DVM F724  Veterinary Bioanalytical Pathology
6 Credits
Offered Fall
Professional veterinary program requirement studying pathology, hematology, biochemistry and cytopathology.
Prerequisites: Successful completion of first year professional veterinary medical program; or permission of instructor.
Lecture + Lab + Other: 5 + 2 + 0

DVM F733  Principles of Surgery
2 Credits
Offered Spring
This course teaches principles and concepts of general and orthopedic surgery, including aseptic technique, surgical instrumentation, suture patterns, tissue healing and wound management. These topics comprise core material that prepares veterinary students for specific surgery.
Prerequisites: Successful completion of first year veterinary medical program; good standing in professional veterinary medicine program.
Lecture + Lab + Other: 1 + 3 + 0

DVM F741  Pathology of Organ Systems
4 Credits
Offered Fall
The course will discuss basic principles of disease with special emphasis on organ system diseases most likely to be encountered in veterinary practice. The discussions will move from general cell mediated processes to more specific disease mechanisms in a variety of domestic and exotic species.
Prerequisites: Successful completion of first year courses in the professional veterinary curriculum.
Lecture + Lab + Other: 3 + 2 + 0

DVM F744  Theriogenology
3 Credits
Will familiarize students with reproductive organs of large and small animals: regulation of function, reproductive endocrinology, reproductive cycles and the physiology and pathology of reproduction.
Prerequisites: Satisfactory completion of year 1 and good standing in professional veterinary program.
Lecture + Lab + Other: 2 + 2 + 0

DVM F745  Clinical Sciences I
5 Credits
Offered Spring
This course is an introduction to clinical reasoning and problem solving as a diagnostician. Diagnostic approaches to common medical problems of cardiovascular, urinary and digestive-hepatic systems.
Prerequisites: Second year professional veterinary medicine program student in good standing or permission of instructor.
Lecture + Lab + Other: 10 + 0 + 0

DVM F747  Clinical Sciences II
5 Credits
Offered Spring
Continuation of clinical reasoning and problem solving as a diagnostician. Diagnostic approaches to common medical problems of cardiac, pulmonary systems and fluid and electrolyte disorders of small and large animals.
Prerequisites: Second year professional veterinary medicine program; student in good standing or permission of instructor.
Lecture + Lab + Other: 10 + 0 + 0

DVM F751  Veterinary Clinical Toxicology
2 Credits
Offered Fall
This course will provide an overview of clinical toxicology relevant to veterinarians.
Prerequisites: Successful completion of all required first year courses in DVM program, including advancement to year two; or permission of instructor.
Lecture + Lab + Other: 2 + 0 + 0
