GEOGRAPHY (GEOG)

GEOG F101X  Expedition Earth: Introduction to Geography  (s)  
3 Credits  
Introduction to essential concepts and approaches of geographic study. Explores physical, political, economic and cultural geography of major world culture regions. Examines each region in relation to others, and in context of global economic, political and environmental change.  
Attributes: UAF GER Social Sciences Req  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F111X  Earth and Environment: Elements of Physical Geography  (n)  
4 Credits  
Offered Fall  
This course explores the processes that create and shape Earth’s physical environment. A global systems approach will be used to describe elements of, and interactions between, the atmosphere, hydrosphere, lithosphere and biosphere. A review of modern mapping techniques including GIS and GPS will be covered. The topic of global change serves as a capstone topic that integrates course concepts allowing for a comprehensive understanding of Earth surface processes. Lab section includes hands-on activities to reinforce lecture material and three field trips. Special lab fees apply.  
Prerequisites: Placement in WRTG F111X or higher; placement in DEV M F105 or higher; or permission of instructor.  
Attributes: UAF GER Natural Science Req  
Lecture + Lab + Other: 3 + 3 + 0  

GEOG F203  World Economic Geography  (s)  
3 Credits  
Offered As Demand Warrants  
Study of the world’s major economic activities: their physical and cultural bases, spatial growth and distribution patterns, and their significance in interregional and international development.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F207  Research Methods and Statistics in Geography  
3 Credits  
Offered Spring Odd-numbered Years  
Introduction to basic data collection and analysis techniques used in geographic research. Explores a variety of qualitative and quantitative geographic research methods. Includes research design, real-world field-work issues, and hands-on use of tools and computer methods for analysis and visual display of spatial data. Students will gain an appreciation of the wide array of research methods and learn to critically interpret results and conclusions from both quantitative and qualitative perspectives.  
Prerequisites: Placement in MATH F113X or MATH F151X; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F222  Fundamentals of Geospatial Sciences  
3 Credits  
Offered As Demand Warrants  
This course is an introduction to the principles and applications of geospatial science (remote sensing, GIS and GPS). Fundamental concepts include electromagnetic radiations, map projections, basic computer science, data formats, map-reading and map-making, etc. Practical exercises include field data collections using GPS, photo-interpretation using image processing and GIS software packages.  
Prerequisites: Placement in MATH F113X or MATH F151X; or permission of instructor.  
Cross-listed with GEOS F222.  
Lecture + Lab + Other: 2.5 + 1.5 + 0  

GEOG F300  Internship in Geography  
1-3 Credits  
Offered As Demand Warrants  
Supervised pre-professional experience in a business or agency (public or private). Open to students majoring or minoring in geography only. Course may be repeated for credit up to a maximum of 6 credits.  
Prerequisites: Placement in MATH F113X or MATH F151X; or permission of instructor; an approved internship plan.  
Lecture + Lab + Other: 0 + 0 + 3-10  

GEOG F302  Geography of Alaska  (s, a)  
3 Credits  
Regional, physical and economic geography of Alaska. Special consideration of the state’s renewable and nonrenewable resources and of plans for their wise use. Frequent class study of representative maps and visual materials.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F303  Geography of United States and Canada  (s, a)  
3 Credits  
Offered Fall Even-numbered Years  
In-depth examination of the natural, political, cultural, and economic characteristics of the U.S. and Canada and their major sub-regions. Explores contrasts in U.S. and Canadian historical, cultural and political geography; sources of national identity; and interactions with aboriginal peoples. Includes economic and political relationships between the two countries, and the role each has played in current and historical world affairs.  
Prerequisites: An introductory geography course or background in United States or Canadian history, social science, or cultures; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0
GEOG F305  Geography of Europe  (W, s)  
3 Credits  
Offered Spring Even-numbered Years  
In-depth examination of the natural, political, cultural and economic characteristics of Europe and its major sub-regions. Explores current political and economic transformations, historical and contemporary world influences, and issues of nationalism and identity.  
Prerequisites: WRTG F111X; WRTG F211X or WRTG F213X; an introductory geography course or background in European history, social science, or culture; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F306  Geography of Russia  (s, a)  
3 Credits  
Offered Spring Even-numbered Years  
Examines the processes that shape the places, regions and landscapes of Russia and the countries of the former Soviet Union. Explores the influence of Northern Eurasia’s physical geography on Russia’s social, political and cultural development; Russia’s role in twenty-first century geopolitical and economic affairs; Russia’s conflicting spatial identities as expressed through art, literature, architecture and political discourse; and environmental attitudes and practices during the Imperial, Soviet and post-Soviet periods.  
Prerequisites: GEOG F101 or HIST F100X; or a course in Russian history or culture; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F307  Weather and Climate  (n, a)  
3 Credits  
Offered Spring  
Weather systems and climate classification. Emphasis on weather system processes, measuring weather variables and physical processes of the atmosphere.  
Prerequisites: GEOG F111X; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F309  Digital Cartography and Geo-Visualization  (s)  
4 Credits  
Offered Spring Odd-numbered Years  
The concepts of map design, layout and presentation to effectively visualize and communicate complex spatial data.  
Prerequisites: Permission of instructor.  
Lecture + Lab + Other: 4 + 0 + 0  

GEOG F311  Geography of Asia  (W, s)  
3 Credits  
Offered Spring Odd-numbered Years  
Examines the natural, political, cultural, and economic characteristics of China, Japan, India-Pakistan, Southeast Asia, and the Asiatic countries of the Middle East. Explores historical and current political and economic transformations, historical, and contemporary world influences, and foundations of regional political, economic, and military conflicts.  
Prerequisites: WRTG F111X; WRTG F211X or WRTG F213X; an introductory geography course or background in Asian history, social science, or culture; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F312  People, Places, and Environment: Principles of Human Geography  (s)  
3 Credits  
Offered Fall  
Examines how human activity manifests itself on the earth’s surface through the geographic lenses of ethnicity, politics, industry, language, religion, and demographics. Explores spatial patterns, relationships and contrasts between places, origin and diffusion of traits, and human interactions with the environment.  
Prerequisites: GEOG F101X; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F338  Introduction to Geographic Information Systems  
3 Credits  
Offered Fall  
Geographic data concepts including mapping systems, data sources, editing data, GIS analysis and computer mapping. Introduction to global positioning systems. GIS applications in natural resources management.  
Prerequisites: Knowledge of PCs or Unix workstations desirable.  
Cross-listed with NRM F338.  
Lecture + Lab + Other: 2 + 3 + 0  

GEOG F339  Maps and Landscape Analysis  (n, n)  
4 Credits  
Offered Spring Odd-numbered Years  
This course will build student knowledge and practical experience regarding the visualization and mapping of landform evolution in response to Earth surface processes. A semester long research project will allow students to gain experience in the collection and use of a variety of datasets and equipment used in landscape analysis including ground penetrating radar, real-time-kinematic GPS, Drones and GIS. Overnight field trip required. Special fees apply.  
Prerequisites: GEOG F111X; GEOS F304; or permission of instructor.  
Crosslisted with GEOS F339.  
Lecture + Lab + Other: 3 + 3 + 0  

GEOG F405  Political Geography  (s)  
3 Credits  
Offered As Demand Warrants  
Geographical analysis of the evolution, structure, internal coherence and sources of strength of individual nation states, with emphasis on nations of the Pacific realm and Arctic periphery. Consideration of regional blocs, spheres of influence and potential for international cooperation.  
Prerequisites: GEOG F101X.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F410  Geography of the Pacific Rim  
3 Credits  
Offered Fall Odd-numbered Years  
Examines the physical and human geography of the Pacific Rim. Will employ both a global and topical approach and include aspects of environmental, historic, economic, social, and political issues. Regional studies on physical and human geographic attributes of selected countries will be analyzed and compared.  
Prerequisites: GEOG F101X; GEOG F111X; or permission of instructor.  
Lecture + Lab + Other: 3 + 0 + 0
GEOG F412  Geography of Climate and Environmental Change (a) 3 Credits
Offered Fall
Serves as a "synthesis" breadth course focusing on the geography of climate and environmental change. The major concepts of global climate processes and climate change will be reviewed on multiple time scales. The impacts of natural and anthropogenic environmental change will be examined through selected case studies and readings (e.g. permafrost, invasive species, sea ice, fire, urbanization).
Prerequisites: GEOG F307 or ATM F101X or ATM F401; or permission of instructor.
Lecture + Lab + Other: 3 + 0 + 0

GEOG F418  Biogeography (a) 3 Credits
Offered Fall
This course explores the geography of life by examining linkages between climate, geomorphology, and ecological communities with emphasis on the biogeography of sub-Arctic, polar and alpine regions.
Prerequisites: BIOL/NRM F277 or BIOL F371; junior/senior standing; or permission of instructor.
Cross-listed with BIOL F418.
Stacked with GEOG F618; BIOL F618.
Lecture + Lab + Other: 3 + 0 + 0

GEOG F420  Geopolitics of Energy (s) 3 Credits
Offered Spring Even-numbered Years
Examines the impacts that energy resource exploration, development, production, and transportation have on the internal politics of various countries in the world, and on international economic and political relationships. Explores the cultural, political, economic, physical, and historical underpinnings of contemporary geopolitical events involving energy resources, and explores possible future scenarios.
Prerequisites: Any of the following courses: GEOG F101X; GEOG F312; GEOG F405; NRM F101; NRM F304; PS F201X; PS F203; PS F321; PS F323; ECON F235X; ECON F335; ECON F349; ECON F463; junior standing; or permission of instructor.
Recommended: GEOG F101X.
Lecture + Lab + Other: 3 + 0 + 0

GEOG F427  Polar Geography (s, a) 3 Credits
Offered Spring Odd-numbered Years
Comparative physical, cultural, political and economic geography of the Circumpolar North and Antarctic regions. Special attention to Arctic natural resource development, climate change in both polar regions and polar geopolitics.
Prerequisites: GEOG F101X or GEOG F111X; or permission of instructor.
Cross-listed with ACNS F427.
Stacked with GEOG F627; ACNS F627.
Lecture + Lab + Other: 3 + 0 + 0

GEOG F430  Google Earth and Neogeography 3 Credits
Offered Spring
Neogeography describes a new generation of primarily web-based mapping techniques and technologies. This course teaches advanced use of some of the latest neogeography tools, such as Google Earth, Maps Engine and Earth Engine. The skills and techniques learned will be applicable in academic, government and industry settings as a way to produce dynamic visualizations from any dataset with a geospatial component, for purposes of data presentation, analysis and research.
Prerequisites: Junior standing with completed course work in geographic methods (GEOG F309; F339; GEOS F304; GEOS F422; GEOS F458; NRM F338; NRM F435); or permission of instructor.
Lecture + Lab + Other: 3 + 0 + 0

GEOG F435  GIS Analysis 4 Credits
Offered Spring
GIS analysis of natural resources including spatial query, attribute query, vector, grid, image, topographic and network analysis techniques.
Cross-listed with NRM F435.
Lecture + Lab + Other: 3 + 3 + 0

GEOG F454  Comparative Farming and Sustainable Food Systems 3 Credits
Offered Fall
Principles of food systems geography and food security. Cross-cultural examination of dietary traditions, poverty, hunger, equity and food access and distribution. Comparison of multiple varieties and scales of agricultural systems in the context of social, ecological and economic sustainability. Considers Alaskan and other high-latitude food systems, including country food, wild game harvest and rural to urban nutrition transition.
Prerequisites: Junior standing; WRTG F211X or WRTG F213X; or permission of instructor.
Cross-listed with NRM F454 and CCS F454.
Lecture + Lab + Other: 3 + 0 + 0

GEOG F460  The Dynamic Alaska Coastline 3 Credits
Offered Spring Even-numbered Years
Alaska’s diverse coastal system provides abundant ecosystem services and globally important resources. This course provides an interdisciplinary perspective on the dynamic coastal landscape of Alaska from Southcentral to the Arctic, and delves into the driving geological, oceanographic and climate processes shaping Alaska’s past and present coastline. Through a semester long research project students will learn how to measure and map coastal changes associated with natural and human perturbations. An overnight field trip will serve as an active learning opportunity to integrate course knowledge with hands-on field work.
Prerequisites: Junior standing; GEOG F111X or GEOG F101; CHEM F105X or PHYS F103X; NRM F338 or equivalent GIS coursework.
Cross-listed with GEOS F460.
Stacked with GEOS F660; GEOG F660.
Lecture + Lab + Other: 3 + 0 + 0

</table>
GEOG F678  Ice Age Alaska  (a)  
3 Credits  
An overview of the paleoenvironments of Alaska including climate, glacier and biotic history including humans. Emphasis on events of the past that have left important legacies on present landscapes. The course begins with two weekend field trips and then surveys key literature describing Alaska's ice-age history. The focus is on Alaska and the Yukon, but topics will range more widely into other parts of the Arctic and its adjacent seas.  
Prerequisites: Graduate standing in anthropology, biological Sciences, Earth science, geography, geoscience, or northern studies; or permission of instructor.  
Cross-listed with GEOS F678.  
Stacked with GEOG F478; GEOS F478.  
Lecture + Lab + Other: 3 + 0 + 0  

GEOG F692  Graduate Seminar  
1-3 Credits  
Topics in natural resources management and geography explored through readings, student presentations, group discussions and guest speakers.  
Prerequisites: Graduate standing or permission of instructor.  
Cross-listed with NRM F692.  
Lecture + Lab + Other: 1-3 + 0 + 0  

GEOG F692P  Graduate Seminar  
1-3 Credits  
Topics in natural resources management and geography explored through readings, student presentations, group discussions and guest speakers.  
Prerequisites: Graduate standing or permission of instructor.  
Cross-listed with NRM F692.  
Lecture + Lab + Other: 1-3 + 0 + 0  

GEOG F699  Thesis  
1-12 Credits  
Lecture + Lab + Other: 0 + 0 + 0
