CENTER FOR GLOBAL CHANGE AND ARCTIC SYSTEM RESEARCH

The Center for Global Change and Arctic System Research facilitates collaborative research by faculty and students in environmental science and earth system studies. The center sponsors an annual student research grant competition that provides support to students for research related to global change with an Arctic or sub-Arctic focus presented in an interdisciplinary context. The center also participates in education and outreach activities on global change and Arctic system research.

For information on education opportunities in earth system and environmental sciences, see Interdisciplinary Studies (http://catalog.uaf.edu/graduate/graduate-degree-programs/interdisciplinary-studies) in the Degrees and Programs section of this catalog, or call 907-474-5415.

For more information about the center and its activities, visit http://www.cgc.uaf.edu or call 907-474-5818.
