Healthcare Management and Leadership Program

M.H.M.L., Healthcare Management and Leadership

The Master of Healthcare Management and Leadership offers management and healthcare administration courses to prepare students for leadership roles in the US healthcare sector including pharmaceuticals, consulting, medical device and health technology companies, hospital systems, insurance companies as well as non-profit and governmental organizations. Students will gain core competencies in healthcare ethics and policy, healthcare information systems, healthcare finance and economics, management, and leadership. A special emphasis is placed on addressing the challenges of providing and managing health care in remote settings.

Minimum Requirements for Healthcare Management & Leadership M.H.M.L.:
30 credits

Graduate Certificate, Healthcare Management and Leadership

The Healthcare Management and Leadership Graduate Certificate is for healthcare professionals seeking to gain specific skills in healthcare administration to advance their careers. The program includes four courses: Survey of Healthcare Administration, Healthcare Law and Ethics, Health Care Finance and Economics and Information Systems and Decision Making in Health Services. Graduates will apply foundational knowledge of the U.S. Healthcare system, effective data-driven decision-making, and managing and communicating with stakeholders to lead process improvement strategies that will better the overall health of the communities they serve.

Minimum Requirements for Healthcare Management and Leadership Graduate Certificate: 12 credits
