B.S., WILDLIFE BIOLOGY AND CONSERVATION

Program Requirements
Students must earn a C- grade or better in each course.

Minimum Requirements for Wildlife Biology and Conservation B.S.: 120 credits

</table>

Complete three from the following:
- BIOL F425 Mammalogy
- BIOL F426 Ornithology
- WLF F421 Ecology and Management of Large Mammals
- WLF F425 Ecology and Management of Birds

Complete two from the following:
- ECON F235X Introduction to Natural Resource Economics
- HIST F411 Environmental History
- NRM F204 Public Lands Law and Policy
- NRM F403 Environmental Decision-Making
- NRM F407 Environmental Law
- PS F447 U.S. Environmental Politics

Complete at least two additional courses at the F300 level or higher (3 or 4 credits) in biology, wildlife biology, fisheries or natural resources management 6-8

Capstone
Satisfactory completion of a capstone research project, which can be done by completing the course project for WLF F301 with either junior or senior standing.

¹ Fulfills the baccalaureate capstone requirement (junior or senior standing required).

Note: B.S. degree candidates are strongly urged to obtain work experience in wildlife-related positions with public resource agencies or private firms. Faculty members can help students contact potential employers.

Requirements for biology teachers (grades 7-12)

Note: We strongly recommend that prospective secondary science teachers seek advising from the Alaska College of Education early in their undergraduate degree program so they can be appropriately advised of the State of Alaska requirements for teacher licensure. Students will apply for admission to the Alaska College of Education's postbaccalaureate teacher preparation program, a one-year intensive program, during their senior year. The above requirements apply to all candidates who apply to the Alaska College of Education for licensure in biology.

</table>

Complete all the requirements of the wildlife biology B.S. degree.

All prospective biology teachers must complete the following:
- BIOL F342 Microbiology
- BIOL F481 Principles of Evolution
- CHEM F321 Organic Chemistry I
- CHEM F325 Organic Chemistry II

All prospective science teachers must complete the following:
- PHIL F481 Philosophy of Science

Note: We strongly recommend that prospective secondary science teachers seek advising from the Alaska College of Education early in their undergraduate degree program so they can be appropriately advised of the State of Alaska requirements for teacher licensure. Students will apply for admission to the Alaska College of Education's postbaccalaureate teacher preparation program, a one-year intensive program, during their senior year. The above requirements apply to all candidates who apply to the Alaska College of Education for licensure in biology.

Complete one of the following:
- WLF F101 Survey of Wildlife Science
- WLF F301 Design of Wildlife Studies ¹
- WLF F322 Principles and Techniques of Wildlife Management
