M.S. Degree
Minimum Requirements for Degree: 30 credits

Computer science is the study of information handling and its application
to the problems of the world. Computing is widely used in support of
activities in science, engineering, business, law, medicine, education and
the social sciences.

The M.S. degree follows the recommendations of the Association for
Computing Machinery and the Institute for Electrical and Electronic
Engineers. The program provides breadth and depth in course work and
culminates with a major unifying project. This program is available to
students who have completed a B.S. degree in computer science at most
institutions. Students from other universities who have completed a
substantial portion of a bachelor's level computer science program may
be admitted to the M.S. program. In such cases, undergraduate courses
may be required to remedy deficiencies.

For admission to the M.S. computer science program, the GRE general
and computer science subject exam is required.

Degree
