STATISTICS

Graduate Certificate

Statistics is a collection of methods and theories used to make decisions or estimate unknown quantities from incomplete information. Statistical techniques are useful, for example, in estimating plant, animal and mineral abundances; forecasting social, political and economic trends; planning field plot experiments in agriculture; performing clinical trials in medical research; and maintaining quality control in industry. Employment opportunities are excellent for statisticians in many of these areas.

As a postbaccalaureate program, the certificate in statistics is equivalent to a full year of graduate statistics courses and is ideal for current graduate students in disciplines other than statistics (especially the sciences). The graduate certificate in statistics encourages a more in-depth study of statistics and provides students a credential recognizing their quantitative expertise.

Graduates of this program could be labeled quantitative biologists, biometricians, quantitative geologists, geostatisticians, or mathematical statisticians depending upon their specific course work. In addition, this program prepares individuals for Ph.D.-level work in statistics or their area of application.

The statistics program is administered by the Department of Mathematics and Statistics.

Minimum Requirements for Statistics Graduate Certificate: 12 credits.

College of Natural Science and Mathematics
Department of Mathematics and Statistics (https://www.uaf.edu/dms/)

Programs

Degree

• M.S., Statistics and Data Science (http://catalog.uaf.edu/graduate/graduate-degree-programs/statistics-data-management/ms/)
• Accelerated B.S., Mathematics/M.S., Statistics and Data Science (http://catalog.uaf.edu/accelerated-programs/accelerated-programs-list/statistics-bs-ms/)

Graduate Certificate

• Graduate Certificate, Statistics (http://catalog.uaf.edu/graduate/graduate-degree-programs/statistics/graduate-certificate/)
