COLLEGES AND SCHOOLS

UAF colleges and schools offer programs leading to occupational endorsements, certificates and associate, bachelor's and master's degrees in the arts, sciences and professions. Doctoral programs are available in areas of particular strength, such as sciences and mathematics.

Community and Technical College

The Community and Technical College fulfills UAF’s community college mission in the greater Fairbanks area by offering high-quality certificate, degree and specialized training programs. Its core purpose is to provide community-driven education to meet needs for workforce development, academic preparation and lifelong learning. CTC helps prepare Alaskans for Alaska’s jobs.

CTC offers more than 40 certificate and degree programs such as allied health and nursing, process technology, applied business and accounting, paramedic and law enforcement academies, information technology, fire science, aviation, and early childhood education.

CTC benefits from strong partnerships with local employers in business, industry and organized labor. Many CTC faculty come from active workplace settings, ensuring that CTC students learn from people at the forefront of their professions.

Many CTC classes are held during evenings or weekends; the college also offers a growing array of courses online. CTC specializes in meeting the needs of nontraditional students who have been away from college or whose work and family obligations make full-time student status challenging, as well as traditional students entering college for the first time.

CTC programs are delivered at nine different locations in throughout the Fairbanks and surrounding area. CTC’s downtown location (604 Barnette St.) provides a one-stop-shop that enables students to take care of all of their university related needs in one convenient location. Each CTC location contains specialized facilities and equipment to support the industry experience and the hands-on education provided through programs such as aviation maintenance, automotive technology, culinary arts, diesel/heavy equipment maintenance, paramedicine and more.

For more information contact CTC at 907-455-2800 or visit http://www.ctc.uaf.edu.

Engineering and Mines

The College of Engineering and Mines includes the academic departments of civil and environmental engineering, computer science, electrical and computer engineering, mechanical engineering, mining and geological engineering, and petroleum engineering, and the research enterprise of the college, the Institute of Northern Engineering. INE houses the Alaska University Transportation Center, the Mineral Industry Research Laboratory, the Petroleum Development Laboratory, and the Water and Environmental Research Center.

CEM offers students a challenging academic experience that will allow them to contribute, compete and succeed in today's global economy. The college offers programs leading to undergraduate and graduate degrees in civil engineering, computer engineering, computer science, electrical engineering, geological engineering, mechanical engineering, mining engineering, petroleum engineering, and water and environmental science. In addition to these degree programs, concentrations in many areas, including Arctic engineering, are available. An engineering Ph.D. program is also offered.

The baccalaureate degree programs in computer science and civil, computer, electrical, geological, mechanical, mining and petroleum engineering are accredited by ABET.

CEM's academic programs provide a basis for advanced study or specialized careers. CEM students benefit from small class sizes through increased interactions with faculty and other students and excellent access to instructional laboratories. The college provides opportunities for undergraduate and graduate students to participate in research. Theoretical and practical hands-on knowledge, in tandem with discipline-related research, gives CEM students the expertise and training they need for their chosen career path.

CEM departments are active in outreach activities such as Engineering Week, the Alaska Summer Research Academy, the Alaska Native Science and Engineering Program, educational workshops, the fundamentals of
engineering examination review course, and a range of short courses for the professional engineering community. Visit http://cem.uaf.edu or call 907-474-7730 for more information.

Fisheries and Ocean Sciences
The College of Fisheries and Ocean Sciences is responsible for statewide academic, research and service programs relating to Alaska's marine and freshwater environments and fisheries.

For undergraduate degrees, CFOS offers a minor and a Bachelor of Arts in fisheries, a Bachelor of Science in fisheries and ocean sciences, and a minor in marine sciences. Fieldwork opportunities are available to undergraduate students through cooperating state and federal agencies, and internships are available with nonprofit and industry fishery partners. Undergraduate fisheries majors are prepared for graduate study or to enter management, private industry or other fields.

Graduate degrees offered by CFOS include Master of Science and doctoral degrees in oceanography, marine biology and fisheries, and a Master of Marine Studies. Students can also pursue studies in seafood science through the fisheries program. Graduate students prepare for careers in university research and education, or research or management with state and federal agencies and private industry. As part of their degree programs, graduate students conduct research in collaboration with faculty, often in remote locations around Alaska and beyond.

Education, research and extension work on freshwater and marine systems are conducted by the departments that make up CFOS. The Institute of Marine Science (http://www.uaf.edu/cfos/research/institute-of-marine-sciences), with major laboratory facilities in Fairbanks and Seward, focuses on oceanographic and marine biological research. The Kasitsna Bay laboratory (http://www.uaf.edu/cfos/about-us/locations/kasitsna-bay), near Homer, is the site for coastal research on intertidal and subtidal communities. The Juneau Center (http://www.uaf.edu/cfos/about-us/locations/juneau) focuses on fisheries research and education. The Kodiak Seafood and Marine Science Center (http://www.uaf.edu/cfos/about-us/locations/kodiak) is focused on research and extension work in seafood science and sustainable harvest technology. The Marine Advisory Program (https://seagrant.uaf.edu/map) offers public education and outreach statewide from its offices in Anchorage and coastal communities. CFOS also operates the oceanographic vessel Sikuliaq, a global-class research vessel designed to work in the ice-laden waters of polar regions. The Sikuliaq is based in Seward.

For more information, visit http://www.uaf.edu/cfos/ or call 907-474-7210.

Graduate School
UAF offers professional licenses, graduate certificates, master's degrees and the Doctor of Philosophy degree in a number of areas. The Graduate School also manages UAF's unique interdisciplinary program where students can work on individualized degrees related to current issues. See the graduate degree requirements and specifics on programs offered.

The Office of the Graduate School provides information and guidance for prospective and current graduate students, including orientation, teaching assistant training and several scholarship and fellowship programs. Information can be found at http://www.uaf.edu/gradsch/ or by calling 907-474-7464.

Liberal Arts
As one of the largest colleges at Alaska's research university, the College of Liberal Arts supports scholarship for further understanding of Alaska and the circumpolar region in a changing global context. CLA offers a classic liberal arts course selection and functions as a hub for degree students and their university education requirements. The core curriculum courses provide breadth to the general education of all UAF undergraduates, while liberal arts undergraduate and graduate programs ground students in their disciplines. Extensive research and creative work inform our teaching to provide students with opportunities to become knowledgeable in and across the arts and humanities, Alaska Native and global languages, and social and behavioral sciences; to develop expertise in specific areas of concentration; and to participate in exciting research both as a graduate student and as an undergraduate. The college provides interdisciplinary learning opportunities beyond the classroom to foster responsibility, comprehension of vital issues, and commitment to the study and understanding of the human dimension in the circumpolar North. More information is available at http://www.uaf.edu/cla/ or by calling 907-474-7231.

Management
The School of Management is a global learning community where innovation in teaching, discovery and service prepares students for professional success that benefits our community, the state of Alaska and the nation. The school's programs include undergraduate degrees in accounting, applied management, business administration, homeland security and emergency management, and sport and recreation business, as well as 10 undergraduate minors. Graduate degrees include a Master of Business Administration, a Master of Security and Disaster Management, and a Ph.D. in natural resources and sustainability. The School of Management is accredited by the Association to Advance Collegiate Schools of Business International and is one of only approximately 1.5% of schools worldwide with an additional specialized accreditation in accounting.

Going beyond the classroom, SOM embraces experiential learning by encouraging students to be active participants in their education through involvement in student organizations, paid internships and events.

For more information, visit http://www.uaf.edu/som/ or call 907-474-7461.

Natural Science and Mathematics
The College of Natural Science and Mathematics offers undergraduate and graduate degrees in the physical and life sciences, including atmospheric sciences, biology and wildlife, chemistry and biochemistry, geosciences, and physics; statistics and mathematics; natural resources and environment; and education. It also hosts a cooperative 2+2 program in veterinary medicine with Colorado State University. CNSM provides most UAF undergraduate courses in science and mathematics, including the general education curriculum and a variety of outreach programs. The college is known for its modern teaching technologies, access to professors and quality undergraduate student advising. CNSM also offers minors in each of its major disciplines.

Academic programs provide a foundation for professional careers or advanced study, and help students develop critical thinking and analytical skills. CNSM majors enjoy close working relationships with faculty and other students. The college provides opportunities for undergraduate and graduate students to work with faculty on research projects. Unique opportunities are available through UAF research centers and institutes,
including the CNSM Division of Research, the Geophysical Institute, the Institute of Arctic Biology, the UA Museum of the North, the International Arctic Research Center, and the Agricultural and Forestry Experiment Station. The fundamental knowledge gained through courses and by working on practical, discipline-related projects gives CNSM graduates the skills and experience they need to enter the job market or continue their education.

CNSM is home to the Biomedical Learning and Student Training program, Alaska Native Science and Engineering Program, and K–12 outreach programs, including the Science Potpourri, the Alaska Summer Research Academy, Inspiring Girls Expeditions and GeoFORCE. In these and other programs, high school and university students work with CNSM faculty on original research projects aimed at improving the quality of life in Alaska.

At the graduate level, CNSM offers master’s and doctoral degrees in the natural sciences, mathematics, and natural resources and sustainability. These advanced programs provide students with research opportunities in laboratory and field settings throughout Alaska. CNSM’s doctoral programs provide opportunities for advanced study leading to academic and professional positions. For more information, visit http://www.uaf.edu/cnsm/ or call 907-474-7608.

**Rural and Community Development**

The College of Rural and Community Development focuses on the needs of nontraditional students, including students who seek skills and degrees suited to the economy and well-being of rural communities. CRCD promotes workforce preparation, economic development, lifelong learning and community development. CRCD campuses provide general and vocational-technical education at the occupational endorsement, certificate and associate degree levels, and baccalaureate degrees in rural development and child development/family studies, and a master’s in rural development. In cooperation with the College of Liberal Arts and the School of Education, CRCD offers baccalaureate and graduate degrees in cross-cultural studies, education and social work as well as a Ph.D. in indigenous studies. CRCD also offers workshops, continuing education and short-term courses, developmental studies, credit for prior learning and other nondegree student services.

CRCD community campuses include Northwest (http://www.nwc.uaf.edu) (Nome), Kuskokwim (http://www.bethel.uaf.edu) (Bethel), Bristol Bay (http://www.uaf.edu/bbc) (Dillingham), Chukchi (http://www.uaf.edu/chukchi) (Kotzebue) and Interior Alaska (http://www.uaf.edu/iac) (Fairbanks, which administers six centers throughout the Interior).

CRCD serves nearly two-thirds of Alaska, encompassing 160 primarily Alaska Native Arctic, sub-Arctic and coastal communities. At least 16 indigenous languages are spoken in the region served by CRCD, and the economy spans subsistence hunting and fishing, small-scale village development and cooperatives, and large-scale international corporate development. The College of Rural and Community Development focuses on responding to students and partners to develop the economic and social well-being of Alaska Native communities and beyond. For more information, visit http://www.uaf.edu/rural/ or call 907-474-7143.
