The Alaska Center for Energy and Power is a statewide, university-led, applied research program. ACEP excels at being responsive to immediate and long term needs of residents, industries and agencies and focuses on research related to community and industry-scale power generation, transmission, heating, and transportation fuels. ACEP prioritizes its work on areas where Alaska has specific needs or where Alaska has a strategic advantage due to resource availability, unique circumstances, or location.

ACEP strives to develop and disseminate practical, cost-effective, and innovative energy solutions for Alaska and beyond. Their three primary products are information, technology and a prepared, professional workforce. ACEP houses the Alaska Hydrokinetic Energy Research Center (http://acep.uaf.edu/programs/alaska-hydrokinetic-energy-research-center.aspx).

For more information, visit the ACEP website (http://acep.uaf.edu) or call 907-474-5402.
